Vitamins to VEGA!

8th. May. 2024

VITAMIN

01

Calcium D-pantothenate: Since the year-end, the calcium pantothenate market has been stable on the whole. Influenced by the customers' concentrated order overbuying before the year, the demand turned light in the first quarter after the year, and the factories mainly executed the orders in the previous period. Into the second quarter, customer inventory orders gradually consumed, recently increased demand. Current price is still at the bottom of the history, can be appropriate to buy inventory. The current export offer USD6.6-7/KG.

AMINO ACID

02

Dongxiao Biological annual output of 120,000 tonnes of high-quality amino acids reconstruction project in the second park in the north plant for construction. Using the fermentation workshop and extraction workshop of the original '30,000 tonnes of high-end erythritol project of Dongxiao Bio', the project can achieve an annual output of 120,000 tonnes of high-quality amino acids (L-lysine sulphate) after the completion of the reconstruction.

API

03

Doxycycline hydrochloride, the mainstream factories continue to stop reporting this week, mainly affected by some manufacturers supplying the market demand, is expected to resume the offer after API. The current market price of 40-41usd/kg with the slow increase in market heat, presumed to follow the slow rise.

FOOD ADDITIVE

04

Recently, affected by the market situation, the transaction price of L-carnitine BASE mainstream manufacturers stabilised to about 160-165 RMB/KG, and the transaction price of foreign market was about 19.5-20 USD/KG. It is expected that the subsequent trend of stabilisation, we will continue to pay attention to the market situation.
